

Exp:no-4-Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

The screenshot shows a web application interface for 'car reservation'. The left sidebar contains a menu with 'Cab Details' selected. The main content area is titled 'cab details' and contains a form with the following fields:

- car name \* (First Name, Last Name)
- cab number \*
- insurance documents \*
- vehicle inspection records \*
- registration documents \*
- maintenance check \*

At the bottom of the form are 'Submit' and 'Reset' buttons.

The screenshot shows the 'All Cab Details' view of the web application. It displays a table with the following data:

car name	cab number	insurance documents	vehicle inspection records	registration documents	maintenance check
Range Rover	TN3456	verified	clear	verified	verified
Maruthi Suzuki	AP1234	verified	clear	verified	no issues
